CAT-002: CSS GRID LAYOUTS DESIGN**TIME: 2HRS 15MIN****SCORE: 30 MARKS****GRADE: PASS/FAIL****PASS MARK: 20/30**

Thank you for being an awesome student at Zalego Academy. We appreciate the hard work you are putting in your learning. Below is your first assessment test on skills you have learned so far.

About this Assessment:

This is a continuation test on CSS Grid and General CSS knowledge.

CSS Grid Layout offers a grid-based layout system, with rows and columns, making it easier to design web pages. It allows us to write better layouts using the in-browser capability of grids. In this mini challenge, you will aim to reproduce a design layout(**similar to the wireframe attached below**) using HTML and CSS.

Please note the behavior on smaller devices as shown.

Prerequisite

- HTML
- CSS/ CSS Media Query
- GIT & GitHub

In this project you translate the design presented using HTML and CSS by performing the following steps:

1. In your **WEB1/WEB2** folder, you will create a folder called:
assignment-002-css-grid-layout-with-media-query [Please, follow the exact naming using hyphen as shown].
2. Open the newly created folder in your VS code and create 2- files. One called **index.html**, and **style.css**.
3. Generate the HTML syntax in your **index.html**. **Link your css file to your HTML**.
4. Review the Design and generate something similar. We appreciate the effort you will put in this project.
Please note that Learning is a continuous and comprehensive process, keep it going.
5. You will create a public GitHub repository called [**assignment-002-css-grid-layout-with-media-query**] and upload the website files to your repository.
6. You will configure the **GitHub** pages for website hosting.
7. You should be able to access the page in your browser once using the unique link generated. At first you might get an error code 404. Please give a wait of 3 Min and refresh your page.
8. Add **CollyneJumah** as a collaborator to your repository.
9. END
